

# Peterhouse Kelvin Science Essay Competition

## Questions - 2023

Please choose **one** of the following questions to answer:

1. Why is Chemistry important?
2. The likelihood of terrestrial microbes colonising Mars is...
3. How far is it to the moon? *Please note that this questions comes with some essential supplementary information which further explains how to formulate both your question and responses to this stimulus.*  
See <https://www.hep.phy.cam.ac.uk/~lester/essayQuestion.html>
4. In 2021 giant tortoises were seen hunting birds, which may be the return of a 'lost' interaction. What implications could such restored interactions have for rewilding projects and conservation efforts for other species?
